

Evidence for selective pathogenicity of *Globisporangium coniferarum* in coniferous urban trees

Supplementary Table 3. Aligned rank transform (ART) ANOVA results for root and crown colonization in seedlings inoculated with *Globisporangium coniferarum*.

S.O.V.	df	Root colonization (%)			Crown colonization (%)		
		MS	F value	P value	MS	F value	P value
Treatment	1	144.44	39.68	0.000003	101.13	34.29	0.000005
Block	2	67.72	18.6	0.000009	56.25	19.08	0.000008
Residuals	3	3.64			2.95	—	—
CV (%)			27.25			31.16
